📍 Kottayam, Kerala, India

Career Objective

Aspiring Electronics and Communication Engineer with a strong interest in space exploration, embedded systems and satellite technologies. Skilled in programming languages such as C and Python, and experienced in using tools like Arduino and Tinkercad. Seeking opportunities to apply technical knowledge and practical skills in real-world engineering projects.

Education

Saintgits College of Engineering

B.Tech Electronics and Communication Engineering (CGPA: 9.66)

2024–Present

St. John The Baptist Higher Secondary School

Higher Secondary

2022–2024

Little Flower Vidyannikethan & Junior College

High School

2020–2022

Technical Skills

Programming: C (Intermediate); Python (Intermediate); HTML (Intermediate); MATLAB (Beginner); Verilog (Beginner)

Tools & IDEs: MATLAB, AutoCAD, Arduino IDE, VS Code, Pycharm, Tinkercad, Roboanalyzer, EasyEDA

Interests: Embedded Systems, Rapid Prototyping, Assistive Tech, IoT

Projects

EduAlign: Developed an ergonomic assistive seating system for individuals with physical disabilities, integrating customizable hardware supports to improve posture and long-term physical health.

Automatic Headlight Dimmer: Designed a smart lighting control system using LDR sensors to automate high-to-low beam switching, enhancing road safety and reducing glare; presented at Srishti 2025.

Dot Dasher: Built a communication interface utilizing ESP32 capacitive touch sensors to interpret Morse code inputs, demonstrating expertise in human-machine interface (HMI) and low-latency signal processing.

Arogya Drishti: Engineered a decentralized health monitoring system for offline disease detection (Dengue, Anemia); implemented node-to-node communication to track potential outbreaks without relying on active internet infrastructure.

Kadalkannu: Developing a marine safety system for fishermen featuring SOS signaling and real-time weather alerts, focusing on robust communication protocols and reliable hardware for harsh environments.

SpineLine: Created a wearable posture monitoring system using IMU sensors and real-time feedback loops to provide instant alerts and data-driven ergonomic corrections.

FlixVerse: Architecting a full-stack movie streaming platform to explore scalable content delivery, database management, and optimized user interface design.

EKaram: Designing an intelligent wearable glove for the elderly to assist with daily tasks and health monitoring; recognized as a selected project for YIP 8.0 for its innovative approach to assistive technology.

Workshops & Training

- AI 101
- MATLAB Introductory Workshop
- Semiconductor Tech Conclave by IEEE SSCS

Achievements & Competitions

- Winner – STRIDE Makethon 2025 (Best Viable Project Award) & Tinkerhub Useless Project 2025
- IEEE Hackathon PROCOMM 25', Dot Hack 25'
- No Code Ninja Web Designing Competition
- Srishti 2025 – National Project Exhibition & Competition, YIP 7.0 by K-DISC

Positions of Responsibility

- Class Representative (2nd Year ECE)
- Creative Team (Saintgits IIC)
- Execom Member (IEEE Saintgits & Drishya Film Club)
- Secretary (IEEE ComSoc Saintgits) & Secretary (Nature Club)

Extracurricular Activities

- Interviewed Malayalam actor Jijo Rajagopal (Horthus Film Seminar)
- Actor in short film "First Floor" (Drishya Saintgits Film Club)
- Member – Astronomy Club and Sahyadri Nature Club

Hobbies & Interests

- Space Exploration, Satellite Design, Presentation and Prototyping
- Project Building, Travelling, Reading, Photography, Acting, and Filmmaking

Languages

- Malayalam
- English
- Hindi
- Tamil
